

HEALTH CENTERS

are consumer-driven and patient-centered organizations that serve as a comprehensive and cost effective primary health care option for America's most underserved communities. Health centers serve everyone, regardless of ability to pay or insurance status. They increase access to health care and provide integrated services based on the unique needs of the communities they serve.

There are **four key components** that define health centers & help them reach America's most underserved communities

1

Located in Areas of High Need

Designated as medically underserved areas or populations by the federal government

2

Comprehensive Set of Services

Based on community needs, health centers offer medical, dental, vision, behavioral health, and enabling services

3

Open to Everyone

Regardless of insurance status or ability to pay, and offer sliding fee scale options to low-income patients

4

Patient-Majority Governing Boards

At least 51% of every health center's governing board must be made up of patients
