

THE KRESGE FOUNDATION

# PRAPARE Readiness Assessment Tool for Primary Care Associations (PCAs)

## Protocol for Responding to and Assessing Patient Assets, Risks, and Experiences

Use this tool to help identify your organization's readiness to support your health center members in implementing PRAPARE and using PRAPARE data.

### Instructions for Use

You can use this tool in several ways:

- Distribute it to members of your leadership team in advance of a meeting where you will discuss its results
- Bring it to a leadership team meeting to discuss readiness
- Have a facilitator use it to rate your leadership team's meeting after a group discussion

The PRAPARE project is a major undertaking and significant leadership is needed to carry it out effectively across multiple health centers. Be honest about the general state of affairs within your PCA organization.

Tally the total number of points. The highest score an organization can receive is 36 points. The closer your organization is to 36 points due to having more points in the *moderately prepared* and *highly prepared* columns, the more ready your organization is ready to support your health center members in implementing PRAPARE and using PRAPARE data. If you have less than 16 points because of having several points in the *not yet prepared* column, look at the statements in the columns for *moderately prepared* or *highly prepared*. These will give you guidance on where you want your organization to be and how to get there. The assessment may suggest the need for organizational development prior to undertaking the PRAPARE project.

Readiness Area	Readiness Component	Not Yet Prepared	Moderately Prepared	Highly Prepared	Points
<b>Social Determinants of Health</b>	At our organization, the social determinants of health....	<input type="checkbox"/> 1 pt.	<input type="checkbox"/> 2 pts.	<input type="checkbox"/> 3 pts.	
		Are not yet incorporated into our organization's initiatives, programs, or projects	Are present in some of our organization's initiatives, programs, or projects, and we have future plans to support health centers with data collection	Are central to our organization's mission, and prioritized within our strategic plan, and we are currently making plans to supports health centers with data collection	
	Regarding staff resources for the social determinants of health....	<input type="checkbox"/> 1 pt.	<input type="checkbox"/> 2 pts.	<input type="checkbox"/> 3 pts.	
		Our organization has not dedicated any staff time to focusing on the social determinants of health	At least <b>part of</b> one FTE's worth of time is dedicated to work that is focused on the social determinants of health	At least <b>one full FTE's</b> worth of time is dedicated to work that is focused on the social determinants of health	
	Regarding the social determinants of health, our staff...	<input type="checkbox"/> 1 pt.	<input type="checkbox"/> 2 pts.	<input type="checkbox"/> 3 pts.	
		Do not possess any knowledge or experience in this area	Have some basic knowledge and experience in this area	Have expertise and extensive experience in this area	
		<input type="checkbox"/> 1 pt.	<input type="checkbox"/> 2 pts.	<input type="checkbox"/> 3 pts.	

	Regarding social determinants of health-focused partnerships, our organization...	Has no understanding of the role that community-based organizations play in addressing patients' social determinants of health, and has not supported health centers in forming external partnerships	Has some familiarity with the role that community-based organizations play in addressing patients' social determinants of health, but has not served in a facilitation role in connecting health centers with those organizations	Has a thorough understanding of the role that community-based organizations play in addressing patients' social determinants of health, and has facilitated health centers' efforts to develop or strengthen external partnerships
