

# Community Health Center Funding

Community Health Centers Operational Funding, FY 2010 – FY 2020  
(in Billions)

Over 70% of federal funding for the Health Centers program comes from the **Health Centers Fund**, which was created in 2010 and extended by Congress on a bipartisan basis in 2018 for an additional two years by the Bipartisan Budget Act (BBA). The FY19 LHHS-Defense Appropriations bill also provided level discretionary 330 grant funding of \$1.63 billion. These resources will continue to be invested in **new health center sites, expansions of capacity** at existing health centers, and **additional services** like **behavioral health, substance abuse and oral health**.
