

# PRAPARE

Protocol for Responding to and Assessing  
Patients' Assets, Risks, and Experiences

## IMPLEMENTATION AND ACTION TOOLKIT

MARCH 2019

NATIONAL ASSOCIATION OF  
Community Health Centers

AAPCHO  
Association of Asian Pacific Community Health Organizations

OPCA  
Oregon Primary  
Care Association

## Acknowledgements

PRAPARE has been a multi-year effort between the National Association of Community Health Centers, the Association of Asian Pacific Community Health Organizations, the Oregon Primary Care Association, and the Institute for Alternative Futures.

PRAPARE was made possible with funding from the Kresge Foundation, the Blue Shield of California Foundation, and the Kaiser Permanente National Community Benefit Fund.

We would like to extend a special thanks to our initial PRAPARE pilot organizations who were the first to develop and implement PRAPARE in different Electronic Health Record systems and workflows: Alliance of Chicago Community Health Services, Health Center Network of New York, HRHCare, Iowa Primary Care Association, La Clinica, OCHIN, Open Door Family Medical Center, Peoples Community Health Clinic, Siouxland Community Health Center, Waianae Coast Comprehensive Health Center, and Waikiki Community Health Center. We would also like to thank Roger Chaufourmier, Julie Edgcomb, and Cheryl Modica for reviewing this Toolkit.

## **PRAPARE Implementation and Action Toolkit**

The Protocol for Responding to and Assessing Patients' Assets, Risks, and Experiences (PRAPARE) is a national effort to help health centers and other providers collect and apply the data they need to better understand their patients' social determinants of health, transform care to meet the needs of their patients, and ultimately improve health and reduce costs. PRAPARE is both a standardized patient risk assessment tool as well as a process and collection of resources to identify and act on the social determinants of health.

The PRAPARE Implementation and Action Toolkit is designed to provide interested users with the resources, best practices, and lessons learned to guide implementation, data collection, and responses to social determinant needs.

This is a modularized toolkit. The Toolkit's chapters focus on the major steps that are needed to implement a new data collection initiative on socioeconomic needs and circumstances. New users are advised to go through the entire Toolkit. Other users may wish to focus on certain chapters to build or enhance capacity in certain areas.

This Toolkit is based on the experiences, best practices, and lessons learned of our early adopting and pioneering health centers. We thank them for sharing their innovations and lessons learned with us so that others can advance their own social determinants of health journey.

# TABLE OF CONTENTS

Click on the chapters below to view resources and best practices on that implementation step. Building off of the roots of the PRAPARE name, chapters are organized based on whether they help users “**PREPARE**” for social determinants data collection, “**ASSESS**” social determinants of health data, or “**RESPOND**” to social determinants of health data. There will be webinars on each chapter to highlight examples from the field.

## ■ Preparing to Gather Data on the Social Determinants of Health

<a href="#">Chapter 1: Understand the PRAPARE Project</a>	1
<a href="#">Chapter 2: Engage Key Stakeholders</a>	11
<a href="#">Chapter 3: Strategize the Implementation Plan</a>	23

## ■ Collect and Assess Social Determinants of Health Data

<a href="#">Chapter 4: Technical Implementation with PRAPARE Electronic Health Record Templates</a>	31
<a href="#">Chapter 5: Workflow Implementation</a>	35
<a href="#">Chapter 6: Develop a Data Strategy</a>	53
<a href="#">Chapter 7: Understand and Evaluate Your Data</a>	67

## ■ Responding to Social Determinants of Health Data

<a href="#">Chapter 8: Building Capacity to Respond to Your Data</a>	73
<a href="#">Chapter 9: Act on Your Data</a>	83
<a href="#">Chapter 10: Track Enabling Services</a>	121
