The Health Resources and Services Administration is surveying health centers weekly to track their COVID-19 response and their patient and staff impacts. 69% (950) of health centers responded this week. Since April 3rd, close to 1.4 million health center patients have been tested for COVID-19.

### National Findings on Health Centers’ Response to COVID-19

**As of June 19, 2020**

#### This week:

**For Virus Detection**
- 148,684 Patients were tested
- 19,191 Patients tested positive
- 55% of patients tested were racial and/or ethnic minorities
- 61% of patients tested positive were racial and/or ethnic minorities

**For Antibody Detection**
- 12,554 Patients were tested
- 1,416 Patients tested positive
- 53% of patients tested were racial and/or ethnic minorities
- 57% of patients tested positive were racial and/or ethnic minorities

### Since April 3rd:

Total patients tested: 1,358,960

Total patients tested positive: 217,542
Surgical Masks
N95/PPR Masks
Gowns
Gloves
Face Masks/Goggles

Health Centers' Access to Personal Protective Equipment (PPE) Improving, But Needs Remain

% of health centers that may run out of personal protective equipment (PPE) items after next week

Turnaround Time for COVID-19 Test Results
% of health centers that experienced the following turnaround times for their patients' results

12 hours or less 24 hours 2-3 days 4-5 days More than 5 days

COVID-19 Results in Extreme Challenges to Health Center Operations, Staffing, and Budgets. This Week:

96% of health centers conducted visits virtually
1,351 health center sites temporarily closed due to COVID-19
6% of health center staff are unable to report to work due to COVID-19

412 staff tested positive

Health center visits are at 73% of normal rates, which have been increasing slightly each week since April

Source and Notes: Data presented in this fact sheet come from the Bureau of Primary Health Care, Health Resources and Services Administration, Health Center COVID-19 Survey collected on June 19, 2020. 69% (950) of federally-funded health centers responded. Survey data are preliminary and do not reflect all health centers. Some duplication of patients tested from week to week may occur. For more information, please visit https://bphc.hrsa.gov/emergency-response/coronavirus-healthcenter-data.
1. Total reported refers to the number of respondents for COVID-19 testing since the survey period starting on April 3, 2020.
2. Due to staff exposure, school closure, site/service closure, and other reasons.
3. Represents the number that tested positive for COVID-19 virus detection.
4. Visits refers to all visits regardless of service type (e.g., medical, dental, behavioral health, etc.), including virtual visits; visits the week prior to April 10 were 47% of pre-COVID normal rates.
