

COMMUNITY HEALTH CENTERS ARE ECONOMIC ENGINES

Community Health Centers provide high quality, comprehensive care to over **30 million patients^a** in **medically underserved communities** across the nation. As health centers leverage the federal and state investments necessary to bring health care where it would otherwise would not exist, they also generate economic gains within the low-income communities they serve. This year health centers are also key to reopening the economy by caring for millions of America's essential workers.

In 2019, health centers:

**CREATED MORE THAN
\$63.4 BILLION
IN TOTAL ECONOMIC ACTIVITY**

DIRECT IMPACTS
from the delivery of care
through a variety of
revenue sources:

**\$31.4
BILLION**

For every \$1 invested solely in federal Health Center Program 330 funding,* health centers collectively generate \$6.38 in total economic activity across the nation.

For example, health center employees use their paychecks to buy goods and services in their community, supporting those businesses and creating an indirect economic impact – or ripple effect.

INDIRECT IMPACTS
generated from their
economic activities:

**\$32.0
BILLION**

GENERATED

ACROSS THE NATION
(in full-time equivalent, or "FTE")

DIRECT FULL-TIME JOBS
in health centers:

253,000

INDIRECT FULL-TIME JOBS
in the community:

202,000

For example, all health centers purchase supplies to provide health services, and their purchases generate job growth for manufacturers, supply chain networks, and companies and non-profits across industries.

State	ECONOMIC IMPACT			JOBS		
	Health Center Grantees	Economic Activity Generated from Every \$1 of 330 Funding:*	Total Economic Impact In Millions	Health Center Jobs in FTE	Other Jobs In the Community in FTE	Total Jobs In FTE
