BUILDING CROSS-SECTOR PARTNERSHIPS TO ADDRESS SDOH: DESIGN SPRINTS

NACHC and AAPCHO are facilitating a series of rapid-cycle, peer-driven training and technical assistance cohorts to better align health centers and community-based social services to improve health equity.

Participating health centers and partner organizations will use the design sprints to:

- ✓ Develop initiatives to tackle social determinants of health needs rooted in structural racism and inequity in their communities;
- ✓ Strengthen collaborative efforts across sectors;
- ✓ Learn problem-solving and design skills that may be applied to future program planning and development.
