

Health Centers' Growth Over the Past Decade

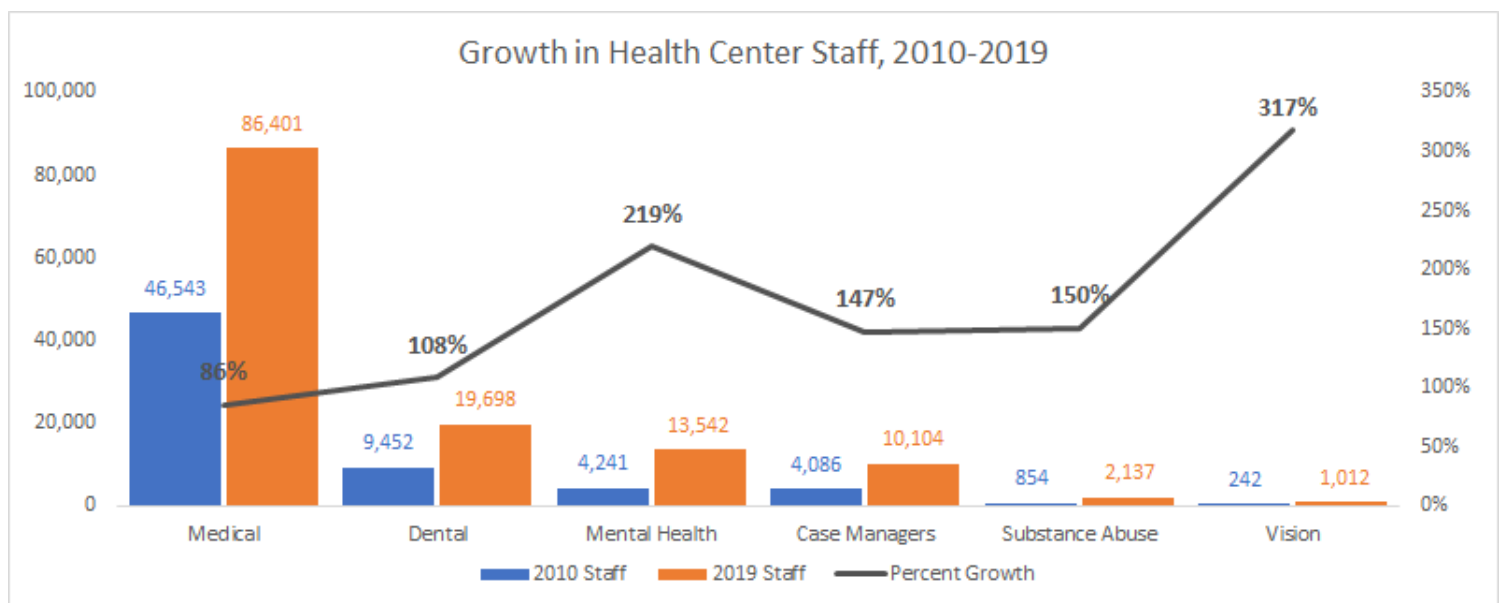

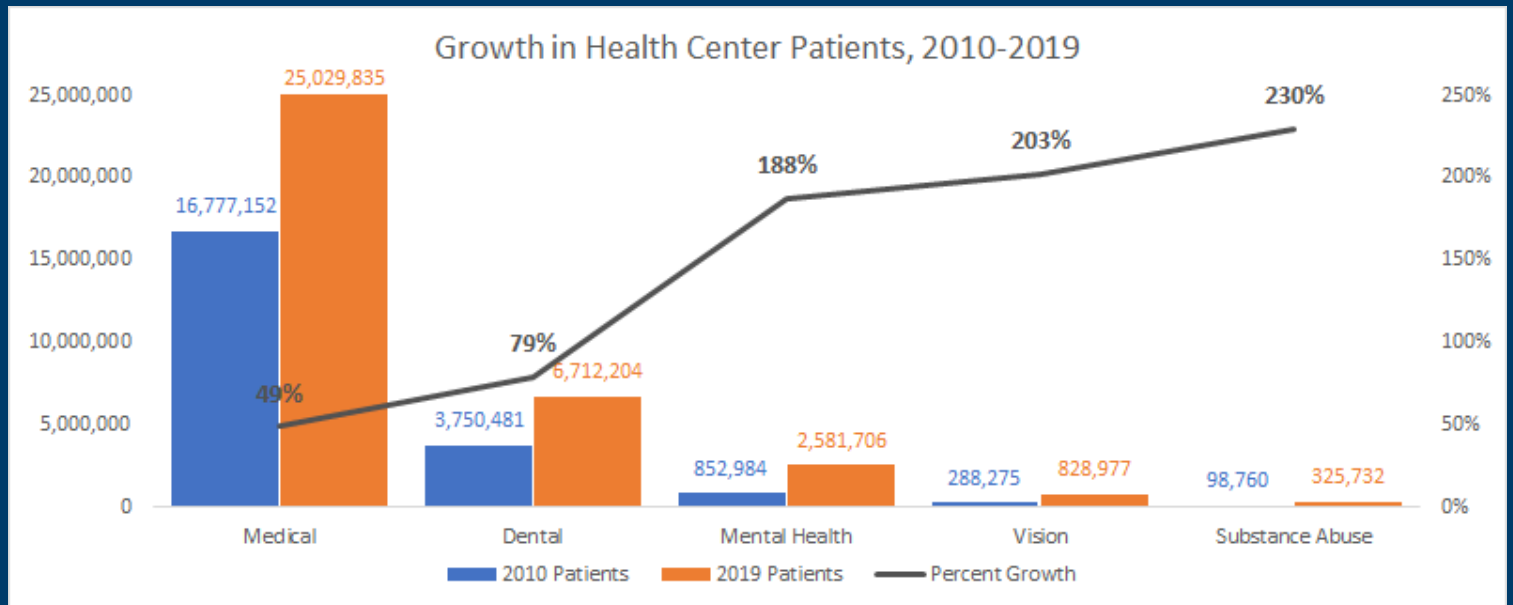

Community, Migrant, Homeless, Public Housing, and other Health Center Program Grantees are non-profit, community-directed, primary and preventive care providers serving many of the nation's low-income and medically underserved communities. Health centers have substantially expanded their capacity and reach since 2010, providing care to more patients each year.

In 2019:

1,385 federally-funded health centers
Over **29 million** patients served
Over **14 thousand** delivery sites
Almost **253,000** staff members

Growth since 2010:

261 more health centers
10 million more patients served
7 thousand more delivery sites
121,000 more staff members

Source and notes: NACHC analyses using data from 2010 and 2019 Uniform Data System, Bureau of Primary Health Care, HRSA, DHHS. Staff is reported as full time equivalent for health center employees. Total staff and total patients include providers and patients for services not presented in this fact sheet. For more information, email research@nachc.org or visit www.nachc.org/research-and-data/.
