Economic Impact of Community Health Centers in Texas

COMMUNITY HEALTH CENTERS IN TEXAS

- Texas is home to 72 Community Health Centers and 726 delivery sites. See Figure 1 for a map of all Community Health Center sites in the state.
- In 2021, clinicians at Community Health
 Centers in Texas treated more than 2.1 million
 patients in nearly 6.3 million visits for primary
 care as well as dental, vision, mental health,
 and substance abuse.

ANALYSIS OF COMMUNITY HEALTH CENTER IMPACT IN TEXAS

Many empirical studies have shown that Community Health Centers have positive effects for patients and yield cost savings by reducing the need for other healthcare services. In addition to these benefits, Community Health Centers positively impact the economies in which they operate by employing workers and supporting additional jobs and economic activity in the area.

According to a Matrix Global Advisors (MGA) analysis, which quantifies the direct and indirect economic impact of Community Health Centers in Texas, these centers supported 30,831 jobs, \$5.3 billion in economic output, and \$2.3 billion in labor income in the state in 2021 (see Figure 2). For results by congressional district, see Table 1 on the next page.

FIGURE 2. Economic Impact of Community Health Centers in Texas

14,247 direct and 16,585 supported jobs

30,831 total jobs

\$1.8B direct and \$3.6B supported economic output

\$5.3B

total economic output

\$1.1B direct and \$1.2B supported labor income

\$2.3B

DATA AND METHODOLOGY

This analysis was conducted by MGA using input-output models, built by IMPLAN, of Texas and its 38 congressional districts. IMPLAN models are widely used across government, academia, nonprofit, and corporate settings. Drawing on publicly available historical economic data, the models project economic indicators (e.g., production and employment levels) by industry. Data from the Health Resources and Services Administration on actual Community Health Center expenses in 2021 serve as inputs to the IMPLAN models.

For a more detailed description of data and methodology as well as national and state-level results, see the full MGA report.

About Community Health Centers

The federal Health Center Program supports qualified community healthcare facilities providing care for medically underserved areas or populations. Federally qualified Community Health Centers, which have been shown to provide vital and cost-efficient healthcare, serve an ever-increasing number of patients, with the majority at or near the federal poverty level. The patient population now totals more than 30 million, but federal funding has not kept pace with the increase in patients or the rise in inflation.

TABLE 1. Economic Impact of Community Health Centers in Texas's Congressional Districts

	Employment			Econor	Economic Output (\$ Millions)			Labor Income (\$ Millions)
