

# VIRGINIA: MOBILE HEALTH CARE PCA& HCCN CONFERENCE GALLERY WALK (2023)

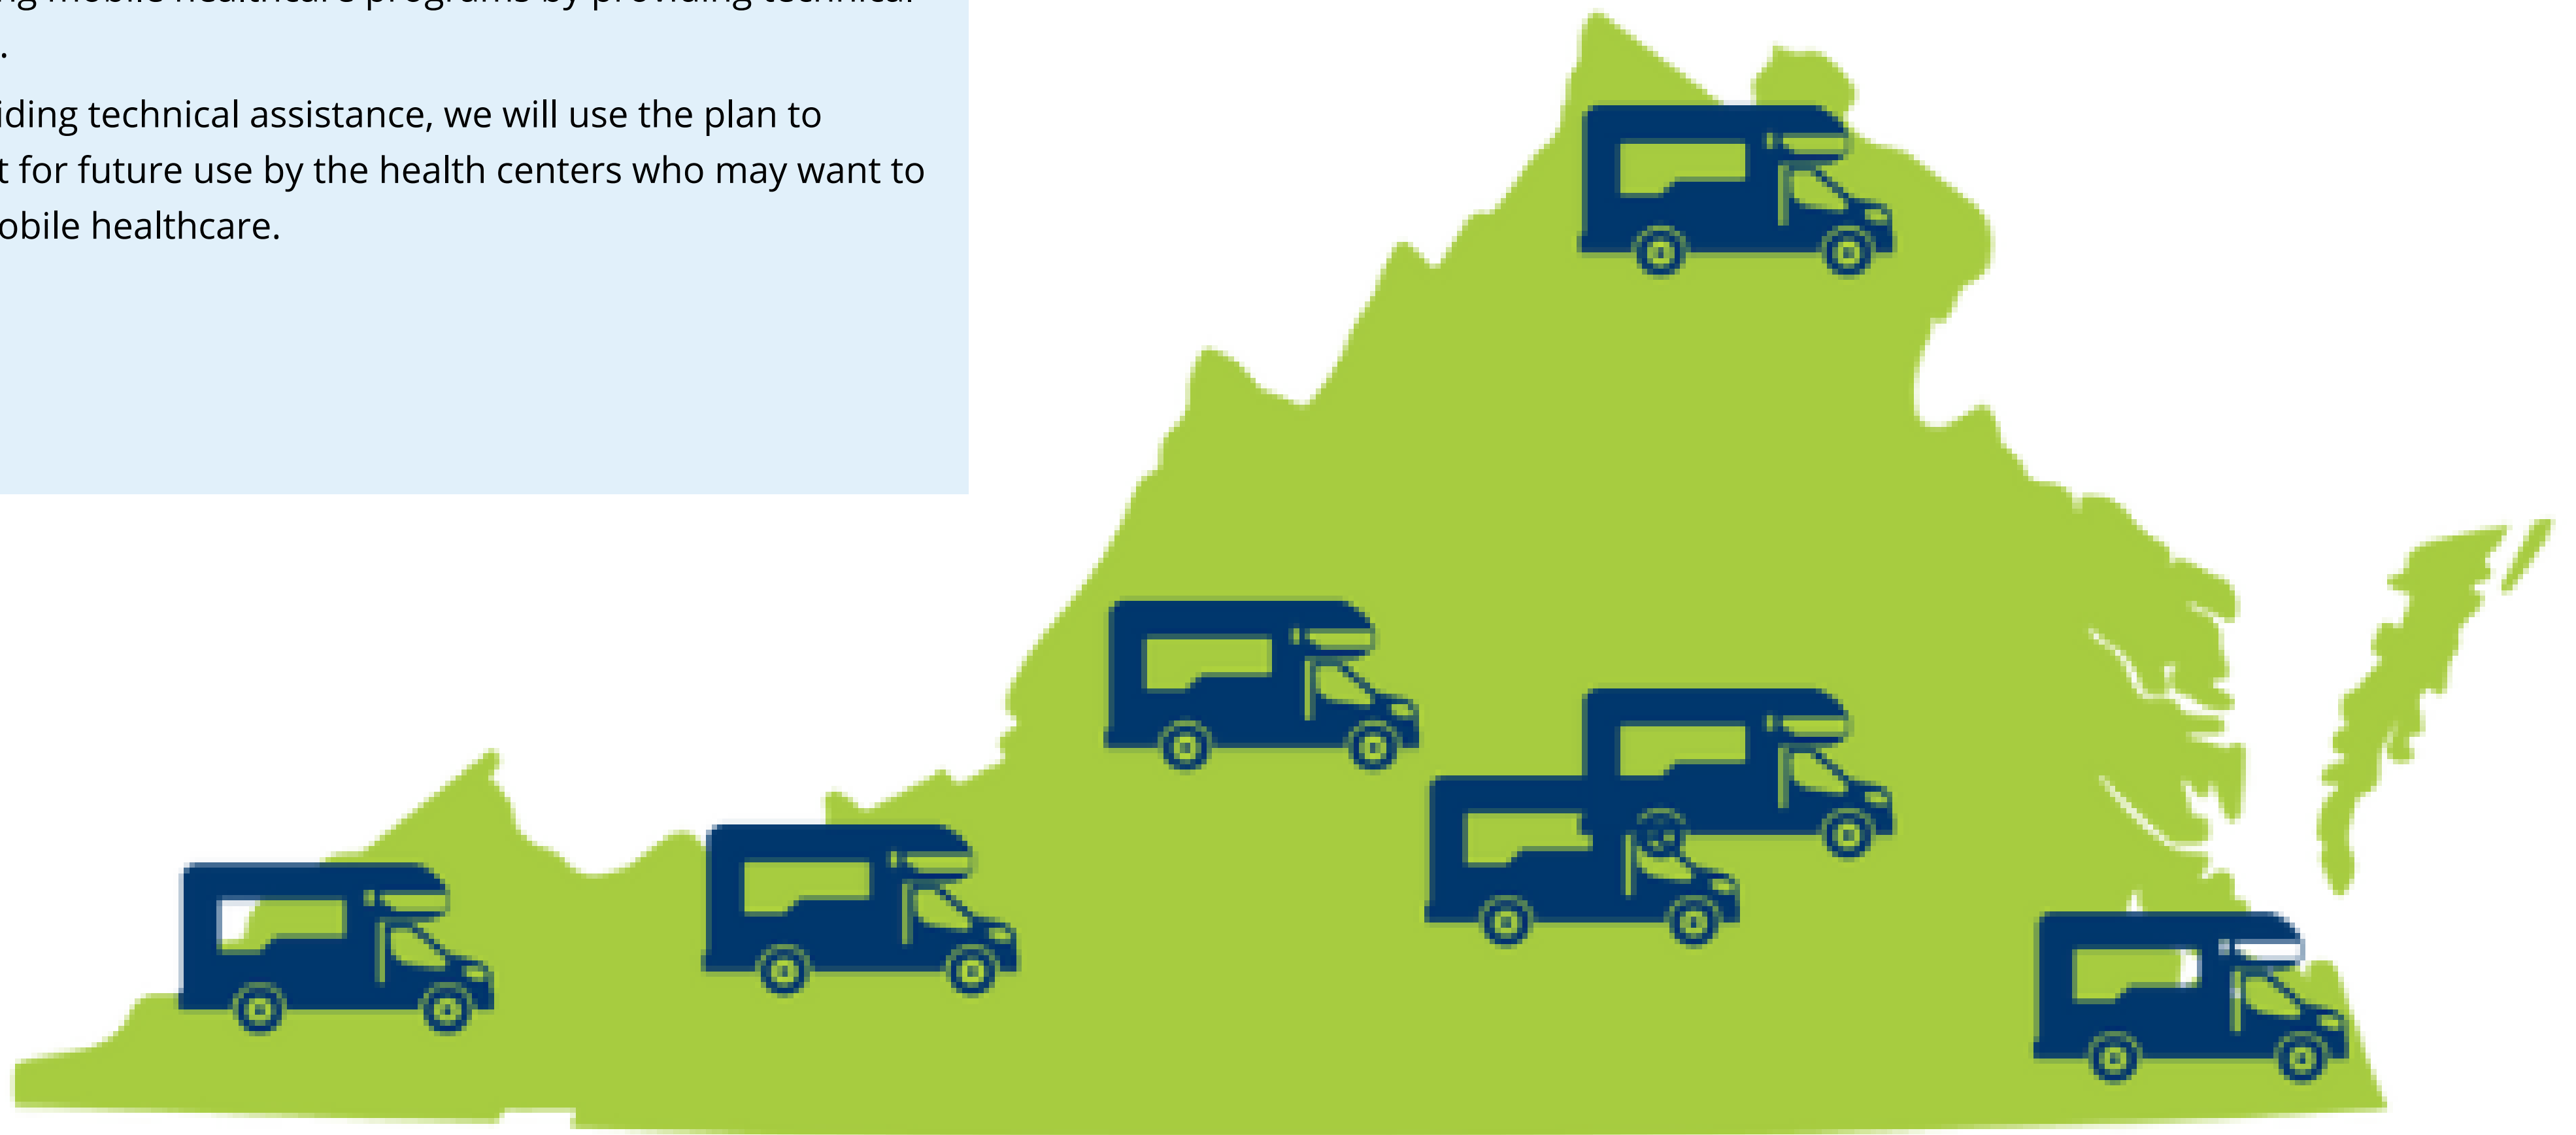

NATIONAL ASSOCIATION OF  
Community Health Centers®

## PROJECT AIM

VCHA is implementing a Mobile Safety Plan for our health centers with existing mobile healthcare programs by providing technical assistance.

After providing technical assistance, we will use the plan to implement for future use by the health centers who may want to provide mobile healthcare.

VCHA has seven FQHCs with Mobile Healthcare Programs across the Commonwealth of Virginia.

Clinch River Health Services in Dungannon, VA.

Daily Planet Health Services in Richmond, VA.

Neighborhood Health in Alexandria, VA

## IMPACT SO FAR

Thanks to our partnerships with mobile healthcare partners, VCHA has begun providing assistance to our health centers with technical assistance.

Health centers who have participated reported through a survey that they enjoyed what they learned, found it very informational, and wanted to learn more.

Health centers had the opportunity to attend the Mobile Healthcare Association's Conference with VCHA. Those who attended learned a great deal, especially when it comes to mobile healthcare safety for the patients and staff.
