The background image shows the Washington Monument standing tall in the center, with its reflection visible in the calm water of the reflecting pool. The scene is captured during the "golden hour" of sunrise or sunset, with a warm, orange glow permeating the sky and water. A long, straight walkway leads from the foreground towards the monument, and a lone figure can be seen walking in the distance. The overall atmosphere is serene and majestic.

TRACK TITLES AND DESCRIPTIONS

340B Compliance and Policy: For decades health centers have participated in the 340B Program supporting critical, comprehensive services to the patients who need it the most. As federal grantees, health centers have unique challenges related to the 340B Program. This track will provide a deep dive into 340B compliance and policy topics specifically from the health center perspective. Additionally, attendees will have the opportunity for peer-to-peer learning and networking with others in the 340B community.

Advocacy and Mobilization: From the grassroots to the grass tops, mobilizing health center advocates must be a priority for all. This track educates and equips learners with the essential skills necessary for sustained messaging and action on policy and legislative issues critical to the survival of the Health Center Program.

Health Center Essentials: Understanding the basic elements of the Health Center Program is essential for serving your community. This track highlights foundational concepts in financial and site operations, program compliance and performance improvement, and health care access for special and vulnerable populations.

Health Center Governance: A strong board that understands its role and effective governance practices is better able to govern the health center and help the health center adapt and thrive in the changing and complex health care environment. This track focuses on health center board roles and responsibilities, good governance practices, and highlights some critical issues for health centers through a governance lens. While these sessions are geared to a board member audience, staff who work with boards may also find them useful.

TRACK TITLES AND DESCRIPTIONS

Policy Analysis: How are recent changes in policy impacting your health center? This track identifies policy issues and the implications on the Health Center Program, site operations, funding, payers, and program requirements, in addition to understanding and applying the latest health center research demonstrating health center value.

Population Health and Quality Improvement: Providing your health center with the necessary tools to understand the evolving needs of your community and the use of a deliberate and defined improvement process is necessary to systematically improve the way care is delivered and improve population health. This track showcases educational sessions on care coordination and population health management, utilizing data to drive quality improvement, and highlighting effective case studies of health centers transforming their practice to provide value-based and competent care.

Value-Based Care/Payment Innovation and Transformation: Some health centers are in the beginning stages of using innovative approaches to transform care and advance toward value-based models of care and payment, and others are further down the path. Regardless, each stage along the continuum will impact the system of care. Understanding what transformation means to your health center and state is a critical part of the practice transformation process. This track delivers education and peer dialogue on the changing health care delivery system including new value-based care models, reimbursement via accountable care models, managed care contracting, and alternative payment methodologies.

Workforce Investment in the Future: Are you investing in your health center's staff and leaders today to build and maintain a high-performing, compassionate health center workforce that delivers high-quality, cost-effective, patient-centered care for the foreseeable future? This track explores resources, techniques, drivers and models to recruit, retain, train and care for your workforce; highlights current trends that make this all the more necessary; and examines approaches to make the case for growing workforce investments.
