

## What are Community Health Centers?

Community Health Centers deliver **high-quality, affordable care** to patients and **reduce costs** for America’s healthcare system. Health centers are **consumer-governed** and patient-centered health care organizations that provide **cost-effective primary care** in **medically underserved communities**. Health centers provide care to all patients regardless of income and insurance status by offering services on a **sliding-fee scale**. Health centers **improve access to primary care** and integrated specialty services such as **preventive, behavioral, substance use treatment, oral, vision and pharmacy** services. Additionally, health centers offer a host of ancillary services to support patients’ needs around food insecurity, housing, transportation, language access, and other **social drivers of health**. Health centers...

- Serve as the health care home for over **30 million patients** in over **14,000 communities** across the country
- Reduce health care costs, **saving** an average of **24% per Medicaid patient** compared to other providers
- **Integrate medical, specialty and social services** such as mental health, substance use treatment, oral health, case management, translation services, transportation, and employment services
- Create **285,000 jobs** and generate an estimated **\$85 billion in total economic activity** in local communities
- Provide care to **400,000 veterans, 1.4 million** patients experiencing homelessness, **3.6 million** adults over age 65, and **8.8 million children**

## Health Centers in Northern Mariana Islands
