

## What are Community Health Centers?

Community health centers (CHCs) deliver high-quality, affordable care to patients and reduce costs for America’s healthcare system. Health centers are consumer-governed, patient-centered health care organizations that provide cost-effective primary care in populations with limited access to health care. Health centers ensure access to patients regardless of income and insurance status by offering services on a sliding-fee scale. Health centers improve access to primary care as well as integrated specialty services such as preventive, behavioral, substance use treatment, oral, vision and pharmacy services. Additionally, health centers offer a host of ancillary services to support patients’ needs around food insecurity, housing, transportation, serving individuals with Limited English Proficiency (LEP), and other non-clinical factors of health. **Health centers...**

- Serve as the health care home for **52 million patients<sup>^</sup>** in over **17,000 communities** across the country
- **Integrate medical, specialty and social services** such as mental health, substance use treatment, oral health, case management, translation services, transportation, and employment services
- Reduce health care costs, **saving** an average of **24% per Medicaid patient** compared to other providers\*\*
- Create **340,000 jobs** and generate an estimated **\$118.4 billion in total economic impact** in local communities\*\*
- Provide care to **428,000 veterans, 1.5 million** homeless individuals, **4.1 million** adults over age 65, and nearly **10 million children**.

## Health Centers in Indiana
